

‘IMGT Protein display for C domain’ header.

The header comprises 5 lines.

Line 1: name of strands (A, B...), turns and loops (AB, BC...).

Line 2: start and end positions of strands, e.g. (1-15).

Line 3: arrows (for the strands).

Line 4: positions according to the IMGT unique numbering for C-DOMAIN and C-LIKE-DOMAIN (Lefranc et al. 2005). Missing positions (32 and 33 in the BC loop and 46 to 76) in the C domain by comparison with the V domain are not shown.

Line 5: Pipes for the start and end positions of strands and loops and highlighted positions, dots for the other positions, plus if needed, numbers for additional positions (for example: 123...) (Lefranc et al. 2005).

Lefranc, M.-P. et al., Dev. Comp. Immunol., 29, 185-203 (2005) [PMID: 15572068](https://pubmed.ncbi.nlm.nih.gov/15572068/)
